Experience

September 2018 - now

Label A

Frontend Developer (September 2018 - now)

Highlights

- Created user-friendly apps, websites and dashboards for clients such as [Dura Vermeer](#), [Stella](#), and [Jobner](#).
- Hosted a talk about Typescript at our frontend meet-up, which was a great success.
- Helped create Label A's own ecosystem-React Prime. Prime is a collection of boilerplates that form the base of all of their projects.

Lead Label A Academy (January 2021 - now)

Highlights

- Helped start new developers get their careers off the ground by providing one-on-one mentorship and guidance through the early stages of their development.
- Host team-wide workshops to create a comprehensive and solid base for developing good applications and to introduce new, cutting-edge techniques.
- Give lessons about Label A's ways of working, and explain what it takes to become a great front end developer.

November 2013 - August 2018

Active Collective

Technical Lead (January 2017 - August 2018)

Highlights

- Built the foundation of the award-winning [PICTURE project](#). A tool that aims to evaluate prior decision-making in glioma surgery and radiation oncology using probability maps.
- Built multiple systems and apps for Lidl, all of which are a cornerstone of their employee branding.

Full-stack developer (November 2013 - January 2017)

July 2016 - November 2016

Jaaf.

Frontend Developer
